

Casio's "New Touch Sensation"

The **QT-6000** Flash ROM Touch Terminal

Dealers, you have ask for it, **now you have it!** The successful TE-8500 on a flash ROM touch screen platform and the result is the **QT-6000**. The repeating comment Casio had received from dealers over the last 2 years was "If you had the TE-8500 software on a touch platform you would have a winner", **the winner is here!** Casio has taken the feature rich software set from the TE-8500, added many more additional features and developed the QT-6000. The additional features found on the QT-6000 provide dealers a stronger alternative solution for Fast Food, Table Service and Retail operations.

Here is why:

- ★ **12.1” TFT flat panel, LCD color operator display**
- ★ **Sleek designed cabinet with pedal stand** (affectionately referred to as the “baby brother” of the QT-8000 because the same cabinet design)
- ★ **The ability to assign graphical icons to keys**
- ★ **Ethernet 10/100 Base-T IRC communications**
- ★ **Table/Room screens with the ability to link servers to particular screens**
- ★ **A graphical, easy to use split check operation**
- ★ **Drive thru screen**
- ★ **The ability to assign names to a table/check button**
- ★ **Sound for easy identification**
- ★ **An optional internal magnetic stripe for the purpose of signing on servers, credit/debit transactions and customer charge identification**
- ★ **Floating customer charge file**
- ★ **The ability to customize keys with size, color, text and graphical icons**
- ★ **15 menu levels**
- ★ **A new electronic journal with wrap capability**
- ★ **Alpha search for PLU’s and departments**
- ★ **Wireless communication capability for IRC (floating of checks, customers, sales consolidation and program downloads)**
- ★ **Six (6) COM ports with the same peripheral connectivity as the TE-8500/QT-2100**
- ★ **Remote terminal monitoring**

These new **sensational** features and more plus the same abundant features found on the TE-8500. All of this **but** a key point is.... It will be like programming a TE-8500 but on a touch screen rather using a physical keyboard. Dealers that have sold and installed TE-8500’s/7000’s will see that navigating through

programming and the other modes will be exactly the same. At least 90% of the programming is the same, the other 10% would be new features and the keyboard programming.

Sign up on the following sheet and join us at the release meeting in your area and learn more about this exciting new product and other new products being released by Casio. An additional bonus being handed out at the meeting is **FREE** programming and reporting software for the QT-6000. That's right, **FREE** programming **and REPORTING** software for the QT-6000. The software, CV-31, gives you the ability to program your touch key templates with color, size and graphic icons in addition to the other program area's and reporting for single sites.

Included with this package will be a QT-6000 price list and brochure.

Order your QT-6000 today from your Casio District Sales Manager or from authorized Casio distributor and experience the **New Casio sensation!** To obtain additional brochures contact Connie House at Casio corporate at (800) 548-0212.

Dealers wanting to know additional information on the features of the QT-6000, latest IPL's (**Casio strongly recommends to dealers to upgrade the QT-6000's IPL out of the box**) or general questions please contact the System Products support line at (800) 633-5586 extension 2.
